

Anderson Repeater Club, Inc.

May, 2018

Our next Club meeting is Tuesday, May 1, 7:00 PM at the EOC. Please plan to attend.

If you have not yet paid your dues for 2018 please do so soon. You can bring them to the meeting, drop them off with Treasurer Tim, or send them to the club mailing address: Anderson Repeater Club, Inc. PO Box 615, Anderson, In 46015. Dues are still \$20 for the year. For those who have already paid the Secretary has your membership certificate & we'll distribute them at the meeting. If you can't attend I'll mail it.

I hope that you noticed in the Anderson Herald Bulletin on April 4 the article about "Project Lifesaver" being launched in Madison County. Lew, K9LBB and Jeff, K9DYR were featured in the picture along with the equipment and a description of the program. Thanks to them and to the rest of the hams who have stepped forward to become certified in this direction finding activity. Jeff reports that the team have completed over 200 man-hours of training so far.

From the ARRL Letter of April 5, I noticed the following:

748,136	US Amateur Radio population at the end of 2017
377,900	Technician Licensees
174,206	General Licensees
145,034	Amateur Extra Licensees
41,938	Advanced Licensees
9,058	Novice Licensees

In 2017 there were 32,196 new licensees. There were more than 7,000 VE examiner sessions conducted serving 35,350 candidates.

Our VE sessions on the third Tuesday of each month have been well received. In April we had 7 candidates, resulting in 4 new Technicians, 2 upgrades to General, and 1 upgrade to Amateur Extra. Thanks to the VE's who make the effort to show up for these sessions. As you know we need 3 VE's to conduct the session. By the way, we forward the entire \$15 we receive from each candidate to the ARRL VEC. The ARRL does an excellent job of responding to our needs for testing supplies and processes the documents that we forward to them promptly. From our testing session on Tuesday we mail the test information to them on Wednesday, and the new or upgraded license usually shows up in the FCC database by the following Wednesday.

Field Day is June 23-24. Mark that weekend on your calendar and plan to participate. The MCARC will be operating as usual. Drop in or stay all weekend and get in some operating.

Thanks to Tim, KB9VE and Mike, KC9DJU for moving the south weather station from the site at BorgWarner to the new site at the South Madison School Corporation Administration building. It's across Exit 219 and a bit farther from the actual intersection, but we're

maintaining the same general designation. The administration building is providing the outgoing internet connection for the station.

I hope that you will find time to utilize the repeaters as the weather improves and we all get out more. Activity has been pretty minimal of late, perhaps because many of us are involved in so many other things but make an effort to reply when you hear someone ID especially if it's a call you don't recognize, perhaps a new ham. We do have a couple of new hams in the area and we need to make them welcome on-air and at meetings.

There are no Minutes from the March Club meeting since we went to the StormNet training on the regularly scheduled evening. As usual this training was well attended by hams and also a number of non-hams.

Make sure to monitor and participate in our StormNet alerts this year. Because our weather has been so cold we've had no need to call any nets (unusual), but I'm sure that before long we'll need your assistance when the weather does get bad. Monitor, prepare and actively participate!

If you have news or other information that you'd like to make the members aware feel free to forward it to me for distribution.

73,
Steve
